

EVEREST ERP

EXTENDED PROFILE

OVERVIEW

Everest ERP is an AI-native system built to replace legacy tools with a single platform that streamlines order-to-cash, revenue tracking, and consolidation, giving executives real-time insights, efficient operations, and regulatory compliance.

AiSpecify lets teams create and test enhancements or full applications using natural language. Users can validate changes in a Live Sandbox before safely publishing them company-wide.

PREBUILT AI AGENTS

With Everest ERP, you can use GenAI to ask simple questions like, “What were our top-selling products this quarter?” and get instant reports and visuals in return.

This allows for:

- "What-if" scenarios for safer decision-making
- Tighter control over system evolution
- Controlled change management
