

MRPEASY

EXTENDED PROFILE

OVERVIEW

Simple yet powerful self-service manufacturing ERP/MRP system. MRPeasy streamlines management of production, inventory, customers, purchasing, finances, and your team in one cloud-based platform.

KEY FEATURES

- Automated, accurate planning with a drag-and-drop Gantt chart and calendar lets you create realistic production schedules and reschedule on the fly by simply dragging manufacturing orders and operations.
- Comprehensive inventory management includes stock movements, batch and serial number tracking, and configurable reorder points to prevent stock-outs. Enjoy complete traceability and a detailed history of all stock operations.
- Built-in costing and quoting tools calculate product costs and optimal delivery dates. Generate quotations and invoices, prepare shipments, and convert confirmed customer orders directly into production jobs.
- Shop-floor and workforce control via a simple web or mobile interface ensures line-level tasks are updated in real time. Capture shop-floor reporting and monitor workforce availability and workloads.
- Purchasing made easy: Raise pre-filled purchase orders with a single click, automate supplier reorders, and track order status throughout the supply chain.
- Financial visibility offers real-time dashboards for cash flow, balance sheet, and profit & loss, providing actionable insights into your business performance.

INTEGRATION AND EXTENSIBILITY

MRPeasy connects

with QuickBooks Online, Xero, Shopify, Magento, Power BI, and 15+ more. API and webhooks are available on paid plans for seamless data exchange.

Designed for small and midsize manufacturers, MRPeasy delivers a complete product manufacturing software solution from shop floor to top floor, with straightforward pricing and rapid deployment.

HOW MUCH DOES MRPEASY COST?

MRPeasy has flexible, tiered pricing without module-based add-ons. All plans include a 30-day free trial, no contracts, and no hidden fees.

Download the extended software profile for a breakdown of the pricing plans. These are based on monthly billing (annual billing includes one month free).

The Gantt chart displays the production schedule and work status for a manufacturing line. The timeline ranges from 20 to 29. The chart is divided into several sections: Manufacturing orders, Production schedule, Work status, Stock status types, ECNs (00), Readings (10), and Startups. The chart shows various work orders (e.g., 001708-000, 001709-000) and their corresponding production schedules (e.g., 001708-000, 001709-000) across the timeline. The chart is color-coded by status: green for 'In stock', yellow for 'Out of stock', and red for 'Not in stock'. The chart also shows the status of the production line (e.g., 'In stock', 'Out of stock') and the status of the work orders (e.g., 'In stock', 'Out of stock').
