

ECMS CLOUD CONSTRUCTION ERP EXTENDED PROFILE

OVERVIEW

eCMS is a cloud-based EFP system developed by Computer Guidance Corporation, specifically designed for the construction industry.

It offers a comprehensive suite of integrated modules to help commercial contractors manage various aspects of their financial and operational processes. The platform's browser-based and mobile-friendly design enables users to access critical information anytime, anywhere, facilitating real-time updates and collaboration.

KEY FEATURES

- **Financial management:** eCMS provides comprehensive accounting tools, including cost accounting, payroll processing, and financial reporting, enabling contractors to maintain tight financial controls and consolidated data.
- **Asset management:** eCMS helps contractors manage equipment lifecycles, tracking maintenance, costs, and revenue. It optimizes fleet maintenance, work orders, and repair decisions for better cost control.
- **Project management:** The software streamlines project management from start to finish, enabling clear communication and efficient content management for smooth collaboration.
- **Business intelligence and analytics:** eCMS delivers integrated financial and project data on demand, allowing for smarter decision-making through advanced business analytics and real-time data access.
- **Cloud deployment:** Hosted in industry-leading Tier III data centers, eCMS ensures 99.99% uptime, automatic disaster recovery, and enhanced security, providing users with reliable access to their data without the need for in-house IT infrastructure.

eCMS's open architecture allows for seamless integration with third-party software, promoting transparent data and process exchange to meet diverse business needs.
